1-Month Career QuickStart ProgramSM

Summary

The Career QuickStart ProgramSM is an accelerated, 1-month outplacement process for employees who are in transition. This program allows candidates to achieve their objectives with the least amount of time. Career QuickStartSM is also the fastest-paced of all the Career Potential consulting programs – and it is designed for those who want to see immediate, tangible results.

The Consulting Process

This career continuation program is based on the strategies, resources and tools in *The Ultimate Career Guide*TM – and as an added bonus, a copy of the “Deluxe Hardcopy Binder and CD Package” is included for every Career QuickStartSM participant.

How This Program Works

Career QuickStartSM offers many advantages over traditional career consulting programs, including:

- **Value:** This program is the most affordable level of one-on-one career consulting; yet the impact of participation is very powerful.
- **Speed:** In this accelerated 4-week program, participants get ramped-up quickly, and start seeing positive results almost immediately.
- **Productivity:** This program greatly increases participants’ productivity, focus and confidence. It provides a structure for accountability and a detailed plan of action, which continues long after the consulting program ends.
- **Action-Oriented:** Candidates benefit from fresh ideas and new perspectives shared by their Senior Consultant. The focus is on immediate implementation, specific action, and proven tactics.

The 1-Month Career QuickStartSM process is highly structured and productive, with specific activities to be completed each week and regular “progress checks.” Although this program is designed to be more independent than the other Career Potential programs, clients are supported by 4 weekly, 30-minute coaching phone calls. Career QuickStartSM clients also benefit from regular e-mail access to the Senior Consultant and brief phone calls between scheduled sessions.

NOTE: If a client decides to “upgrade” to the 3-month Career MentorSM program or the 6-month Career PartnerSM program, 100% of the Career QuickStartSM investment will be applied to the fee for either of the longer consulting programs.

3-Month Career Mentor ProgramSM

Summary

This dynamic, 3-month outplacement program helps candidates conduct a highly-effective career transition or job search campaign. Candidates work through the proprietary Career Potential process, and are carefully mentored and supported by their Senior Consultant every step of the way.

The Consulting Process

The Senior Consultant takes participants through the Career Mentor ProgramSM to reveal what they really want, and then plans a strategy to get them there. During the course of the 12-week engagement, we conduct a thorough, confidential career analysis and evaluation, and then execute a detailed career action plan that leverages the participant's proven strengths – building a bridge to the next level of professional success.

How This Program Works

Utilizing all the strategies, resources, exercises and tools in *The Ultimate Career Guide*TM, Career Potential provides an intensive, one-on-one consulting experience, including ongoing support via e-mail and phone for a period of 3 months. While our Career MentorSM engagement is shorter than the Career Partner ProgramSM, it makes a substantial impact and generates exceptional results.

Every Career MentorSM engagement includes:

- Exploration of professional background, including personal values, work history, education, goals, etc.
- Evaluation of career strengths, styles, and preferences
- Discussion, analysis, and selection of potential career paths
- Strategies for researching selected careers and job alternatives
- Action planning, implementation help with the search campaign, and on-going support
- Preparation of the resume and all relevant documents, for a comprehensive "Executive Portfolio"
- Career coaching in specific job-seeking skills, such as networking, interviewing, negotiating, etc.

Counselor, coach, editor, strategist, advocate, mentor, "sounding board" – the Senior Consultant will probably fulfill all these roles at different times in the consulting relationship. There is a personal commitment between Career Potential and every participant in the Career Mentor ProgramSM. We see it as a partnership aimed at a single goal: helping candidates create and sustain the kind of careers they really want!

6-Month Career Partner ProgramSM

Summary

This premier, 6-month career transition program offers employees the most intensive one-on-one counsel, strategy and support. Candidates enter into a “partnership” with their Senior Consultant, with whom they work very closely throughout the entire process.

The Consulting Process

Career Potential takes candidates through a comprehensive, confidential career analysis to reveal what they really want, and then plans a strategy to get them there. By going through our proprietary five-phase career consulting process, we implement a detailed plan of action that leverages the candidate’s proven strengths and builds his or her career to even higher levels of success!

How This Program Works

Although every candidate is different, this exclusive Career PartnerSM engagement typically includes:

- Exploration of professional background, including personal values, work history, education, goals, etc.
- Evaluation of career strengths, styles, and preferences – including formal career assessments
- Discussion, analysis, and selection of potential career paths
- Strategies for researching selected careers and job alternatives
- Access to extensive online career resources
- Action planning, implementation help with the search campaign, and on-going support
- Preparation of the resume and many other documents, for a comprehensive “executive portfolio”
- Career coaching in specific job-seeking skills, such as networking, interviewing, etc.
- Intensive guidance through negotiations, offers, and comparison of opportunities
- Assimilation coaching (into the new position) to ensure a successful “landing”

Counselor, coach, editor, strategist, advocate, mentor, “sounding board” – the Senior Consultant will probably fulfill all these roles at different times in the consulting relationship. There is a personal commitment between Career Potential and every participant in the Career Partner ProgramSM. We see it as a partnership aimed at a single goal: helping candidates create and sustain the kind of careers they really want!
